

Presenter/Assessor: Ginger Elliott Briggs

Ginger is the President and Technical Director of Bio-Analytical Laboratories Incorporated of Doyline, Louisiana, which she helped to establish in 1993 and is now the sole owner. She received a Bachelor's of Life Sciences degree in Microbiology from Louisiana Tech University in Ruston, Louisiana in 1988, as well as continuing education training in Whole Effluent Toxicity Testing and Toxicity Reduction Evaluations from the University of Texas at Austin and the United States Environmental Protection Agency. She has approximately 30 years of experience conducting whole effluent toxicity (WET) tests and Toxicity Reduction Evaluations, conducting various microbiological analyses, managing a nationally certified laboratory based on standards equivalent to ISO 1025, and environmental consulting.

Ginger is a member of The NELAC Institute's (TNI) Small Laboratory Advocacy Group (SLAG), has served on the TNI WETT PT Standards Subcommittee and is full voting member of the TNI WETT Expert Committee. Recently, she was the lead presenter of TNI's WETT Assessor's Forum at the 2016 Forum on Environmental Accreditation/Environmental Measurement Symposium in Orange County, California as well as the lead presenter of TNI's new WET Webinar on Understanding WET Testing. She has also given several presentations at the EPA Region 6 Quality Control Annual Conference and at the EPA Region 6 Pretreatment Annual Conferences.

When not working, Ginger enjoys being with her husband, Tommy, visiting with her three sons and their families, painting and putting up with her two cats.

"Deere in the Snow" by Ginger Elliott Briggs
